OBJECTIVE

Full-stack Developer (4+ years) with strong frontend expertise (React, Next.js), currently working on Japanese projects.

Seeking to further improve Japanese communication skills and understanding of Japanese working culture through the Go Japan Skill Up Program, with a long-term goal of working in Japan as a bridge engineer.

CAREER GOAL IN JAPAN

- Work as a Full-stack/Frontend Engineer in Japan
- Improve Japanese to business level (N2 → N1)
- Become a Bridge SE connecting Japanese clients and Vietnamese development teams

EDUCATION

FPT University 2018 - 2022

Major: Software Engineering

Graduation Project: Freelance Services Web App (ReactJS + Java + MongoDB) — *Tech Lead Role*

SKILLS

FRONTEND

WORK EXPERIENCE

Wasabi (Outsourcing Projects for Japanese Clients)

05/2024 - Present

FULL-STACK DEVELOPER (FRONTEND-FOCUSED)

- Developed web applications for **Japanese clients** using **Next.js** and **React**, supporting real-world systems such as exam registration and booking platforms
- Designed reusable component architecture and optimized performance (lazy loading, caching), improving responsiveness and maintainability
- Built and integrated **RESTful APIs** using **NestJS** and **MySQL** for reporting and user management features
- Collaborated with BA, backend, and QA teams in an agile environment, aligning technical solutions with business requirements
- Mentored junior developers, conducted code reviews, and contributed to improving overall team productivity

Vbee (AI Product Team)

09/2022 - 04/2024

FULL-STACK DEVELOPER (FRONTEND-FOCUSED)

- Developed AI-powered platforms (AI Voice, AI Call Center) using **React**, **Redux Toolkit**, and **WebSocket** for real-time interaction
- Built dynamic dashboards and reusable UI components to support flexible call flows and large-scale usage
- Implemented backend cron jobs with Node.js to automate campaign processing and system workflows
- Integrated RESTful APIs and contributed to backend logic including authentication and data processing
- Participated in UX analysis and system improvements, contributing to product scalability and maintainability
- Collaborated with cross-functional teams (PM, QA, backend) in agile development

PROJECTS

NK Class - Wasabi **06/2024 - Present**

Examination Registration System (Japan)

- Developed frontend for an exam registration system used by ClassNK (Japan Maritime Association), supporting user registration and exam management
- Built reusable component architecture and optimized data fetching using SWR to improve performance and scalability
- Implemented features such as user management, exam registration, reporting, and PDF certificate generation
- Collaborated with backend and QA teams to ensure stable delivery in agile development

Technologies: Next.js, React, TailwindCSS, Ant Design, SWR, NestJS, MySQL

Tobutoptour - Wasabi **06/2025 - 10/2025**

Scheduling and booking system for Tobu, used by medical companies and healthcare staff in Japan.

React.js, Next.js, TypeScript, TailwindCSS, Ant Design

BACKEND

Node.js (Express, NestJS), RESTful API

DATABASES

MySQL, MongoDB

ARCHITECTURE & PERFORMANCE

Component-based design, scalable architecture, caching, lazy loading, applied SOLID, DRY, KISS principles

DEVOPS & TOOLS

Git, Docker (basic), CI/CD (GitHub Actions)

OTHERS

Agile/Scrum, teamwork, mentoring, code review

LANGUAGES:

Japanese: JLPT N4 (currently improving toward N2)
- Experience working with Japanese clients
- Basic communication in work context
English (Technical reading)

• Developed frontend for a booking system used by healthcare staff in Japan
• Built scalable UI components and form management to support complex scheduling and booking workflows
• Integrated backend APIs and contributed to user management features
• Optimized UI/UX across devices to ensure consistent user experience
Technologies: Next.js, React, TailwindCSS, Ant Design, SWR, NestJS

AI Call Center - Vbee **04/2023 - 04/2024**

AI-powered call center system that automates outbound calling and conversation analysis for enterprise clients.

• Developed a real-time call center system using React and WebSocket for managing outbound calls and conversation flows
• Built agent dashboard displaying call status, history, and interaction data
• Implemented dynamic UI components to support flexible call scenarios
• Contributed to backend cron jobs for automated campaign processing
Technologies: React, Redux Toolkit, WebSocket, Node.js

AI Voice - Vbee **09-2022 - 04/2023**

Text-to-Speech Platform

• Developed UI for generating and managing AI-generated voices
• Integrated real-time features using WebSocket for audio processing feedback
• Connected backend APIs for audio generation and storage handling
Technologies: React, Redux Saga, WebSocket

Landing Page Projects (Wasabi - Vbee) **09-2022 - Present**

(Various corporate and product landing pages: **NK Portal, Untensha Shokuba, AI Hub, Mobiva, VBee**)

• Developed multiple landing pages using Next.js and TailwindCSS for various products and clients
• Optimized SEO performance (Lighthouse SEO >80) and responsive design
• Integrated Google Sheets and Apps Script to enable content management for non-technical users, including Japanese clients
Technologies: Next.js, TailwindCSS, WordPress, Google Apps Script
